

Cloud Services

Microsoft Azure Everywhere Workshop

Get Hands-On Experience with Azure

Learn the fundamentals of Azure through this Microsoft-funded workshop that will empower you to create and deploy your own scalable infrastructure.

LECTURES

DEMOS

LABS

CUSTOM
AGENDA

What You'll Learn

- Introduction to the Azure computing platform and public cloud
- What IaaS, PaaS, and SaaS services are available in Azure
- How to successfully develop and deploy applications
- Best practices for securing workloads and data

Our Process:

- Tailor the workshop around topics you choose
- Provide hands-on experience in a live Azure environment
- Get you ready to manage a cloud platform
- Help you take next steps with a Cloud Readiness Assessment

Workshop Overview

iT1 helps you set your cloud direction in Azure with our Azure Everywhere Workshop.

The workshop is one full day of hands-on training that introduces you to Azure and lets you experience a live Azure workload in your own environment.

The workshop can also be tailored around topics you choose such as:

- Setting an Effective Cloud Strategy
- Budgeting for Azure
- Understanding Security in Azure
- Business Continuity in Azure
- Dev and Test on Azure
- Understanding Azure Active Directory
- SQL on Azure
- Desktops in Azure
- Storage in Azure

"iT1's cloud knowledge and experience helped us avoid common mistakes. We gained valuable insight into industry best practices that saved us time and money."
