## Get Smarter Faster About Cloud

*Let iT1 help you build the competencies and maturity you need to take your next steps in the cloud.*

**APPLICATIONS**  **WORKLOADS**  **DATA**  **SERVICES**

## Your Challenges:

Build robust, secure, and insightful cloud strategies

Migrate applications and workloads to the cloud

Support operational tasks such as security, cost, and vendor management

Leverage the cloud for data management, backup, and recovery

## How We Help:

Help set your cloud strategy and educate and train you on cloud best practices

Design, build, migrate, and automate secure cloud environments

Right-size virtual machines, identify underutilization, and overprovisioning

Ensure business continuity and disaster recovery

## Our Approach

Pressure sometimes comes from the wrong places on why a particular cloud model, technology, or service is the right choice. IT leaders jump in "feet first," only to find themselves backtracking within a year or two.

At iT1, our approach is different.

We start with questions about your business goals then address the applications, workloads, data, and services that need to be delivered. Our practices focuses on four major phases of the enterprise cloud adoption lifecycle:

• Adopt a Cloud Strategy

• Tailor Enterprise Cloud

• Optimize and Manage Cloud Costs

• Ensure Uptime

## Our Cloud Practice

*We want to earn your cloud business by helping you keep a firm focus on your business goals, systematically explaining the processes and risks, and helping you make the directionally correct decisions that will best serve your interests.*
