

IT Configuration Services

Technology that is Ready to Go, Faster

iT1's Labs will custom configure and test your technology solutions, then secure, manage, and maintain them across their lifecycle.

INTEGRATION & CONFIGURATION

CUSTOM IMAGING

INVENTORY MANAGEMENT

REPAIR & WAREHOUSING

Your Challenges:

- Limited staff to setup and configure new technology solutions
- Stay on-schedule and on-budget with complex, multi-site deployments
- Track, manage, repair, and dispose of IT assets

How We Help:

- Bring certified IT experts to your deployment projects
- Provide state-of-the-art labs to test new technology and integration services
- Provide full lifecycle services for technology assets, from cradle to grave
- Offer warranty and repair services

Service Overview

iT1's Configuration Lab helps your IT staff save valuable time in configuring and deploying your technology solutions, from complex multi-site deployments to single-device provisioning.

We work with Fortune 500 and enterprise clients to provide a full lifecycle of IT configuration and maintenance services, including:

- Hardware integration
- Software configuration
- Desktop and laptop imaging
- Advanced and custom image integration
- Image maintenance
- Rack configuration and implementation
- Inventory management and reporting
- Warehousing
- Asset tracking, salvage, and disposal
- Warranty repair
- Pre-build and bundling or "kitting" options
