# The Nucleos Learning Platform

The most advanced learning & training platform for corrections

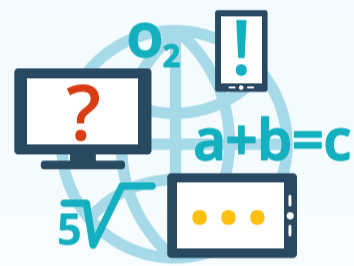

Benefits

1. Increased Education Outcomes

2. Utmost Security

3. Administrative Efficiency

Increase Education Outcomes

The Nucleos learning platform helps support the best possible education outcomes through:

Access to high-quality content

The Nucleos platform can easily integrate content from a wide-range of sources, and can leverage online content and programs securely, to take advantage of the highest-quality proven courses and applications.

Time to Learn & Teach

Digital learning provides a way to support existing in-person programs by increasing time to learn for students. Additional time-saving features such as single-sign-on and automatic rostering of students across learning applications on the platform give teachers more time to teach.

Accredited Content & Certifications

Work with content partners with hundreds of vocational certificate courses and industry certification programs. We can support accredited high school, college courses, and testing.

Evidence-based programs

The Nucleos platform supports evidence based education programs, by allowing detailed tracking of outcomes, and recording of progress across all learning applications & assessments on digital learning records.

Enable Admin Efficiency

Support Evidence-Based Programs and Improve Operating Efficiency

Enterprise Application Management

- Integrations with Offender Management Systems
- Automated user rostering across 3rd-party applications
- Single-Sign On
- Aggregated app message logging

Learning Records and Progress Reports

- Automatically generate learning progress reports
- Aggregated learning records and course progress data from e-learning apps and learning management systems
- App management and access controls

Flexible Deployment Options

The Nucleos platform can be deployed on multiple hardware and with network configurations matched to facility requirements

Hardware Support

Computer Labs

Chromebooks or Laptops

View our Chromebooks options

Tablets

Network Deployment Models

Secure Cloud

- Filtered Internet running through cloud security middleware

- Local caching available

Wide Area Network

- Support across multi-site wide area networks

Local Area Network

- Local networks are only available within one facility

Best in-class content support

In addition to being able to integrate any applications & content, we support educational tools and content to augment existing education programs

Post-secondary Courses
• Learning management systems
• Reference materials
• FAFSA applications
• Distance learning

Adult Basic Education
• Test prep and digital testing

High School & GED
• High school credit recovery
• High-School equivalency test prep and testing

Literacy

Vocational
• Vocational / Industry certificate programs
• Vocational training courses
• Occupational license exams

Language Courses

Reference Material

Social & Emotional Wellness
• Cognitive behavioral wellness
• Social skills / soft skills

Reentry
• Life skills
• Using technology basics
• Reentry guides & links to support programs
