

# PREVENT, DETECT, AND REMEDIATE ... QUICKLY AND EASILY

Cyber threats are complicated enough to maneuver, without the added complexity of managing your cybersecurity technology.

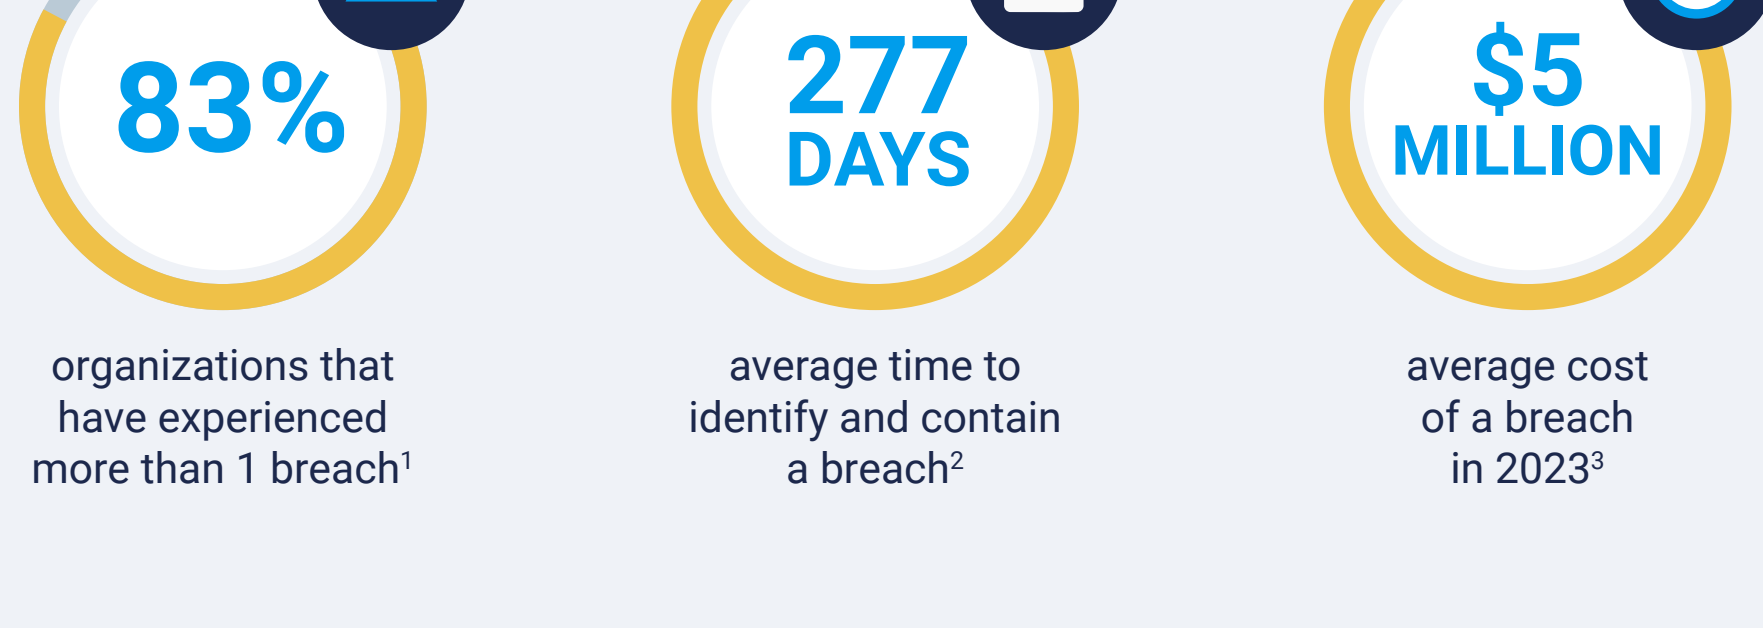

## Every day, your team deals

- Making sense of dozens (or hundreds) of security alerts.
- Doing everything with limited expertise, time, and resources.
- Blocking malware at endpoints, then scrambling when it gets through.
- Keeping up with all the latest software vulnerabilities.

Constantly pivoting between security tools to manage the latest threats.

## The threats are real

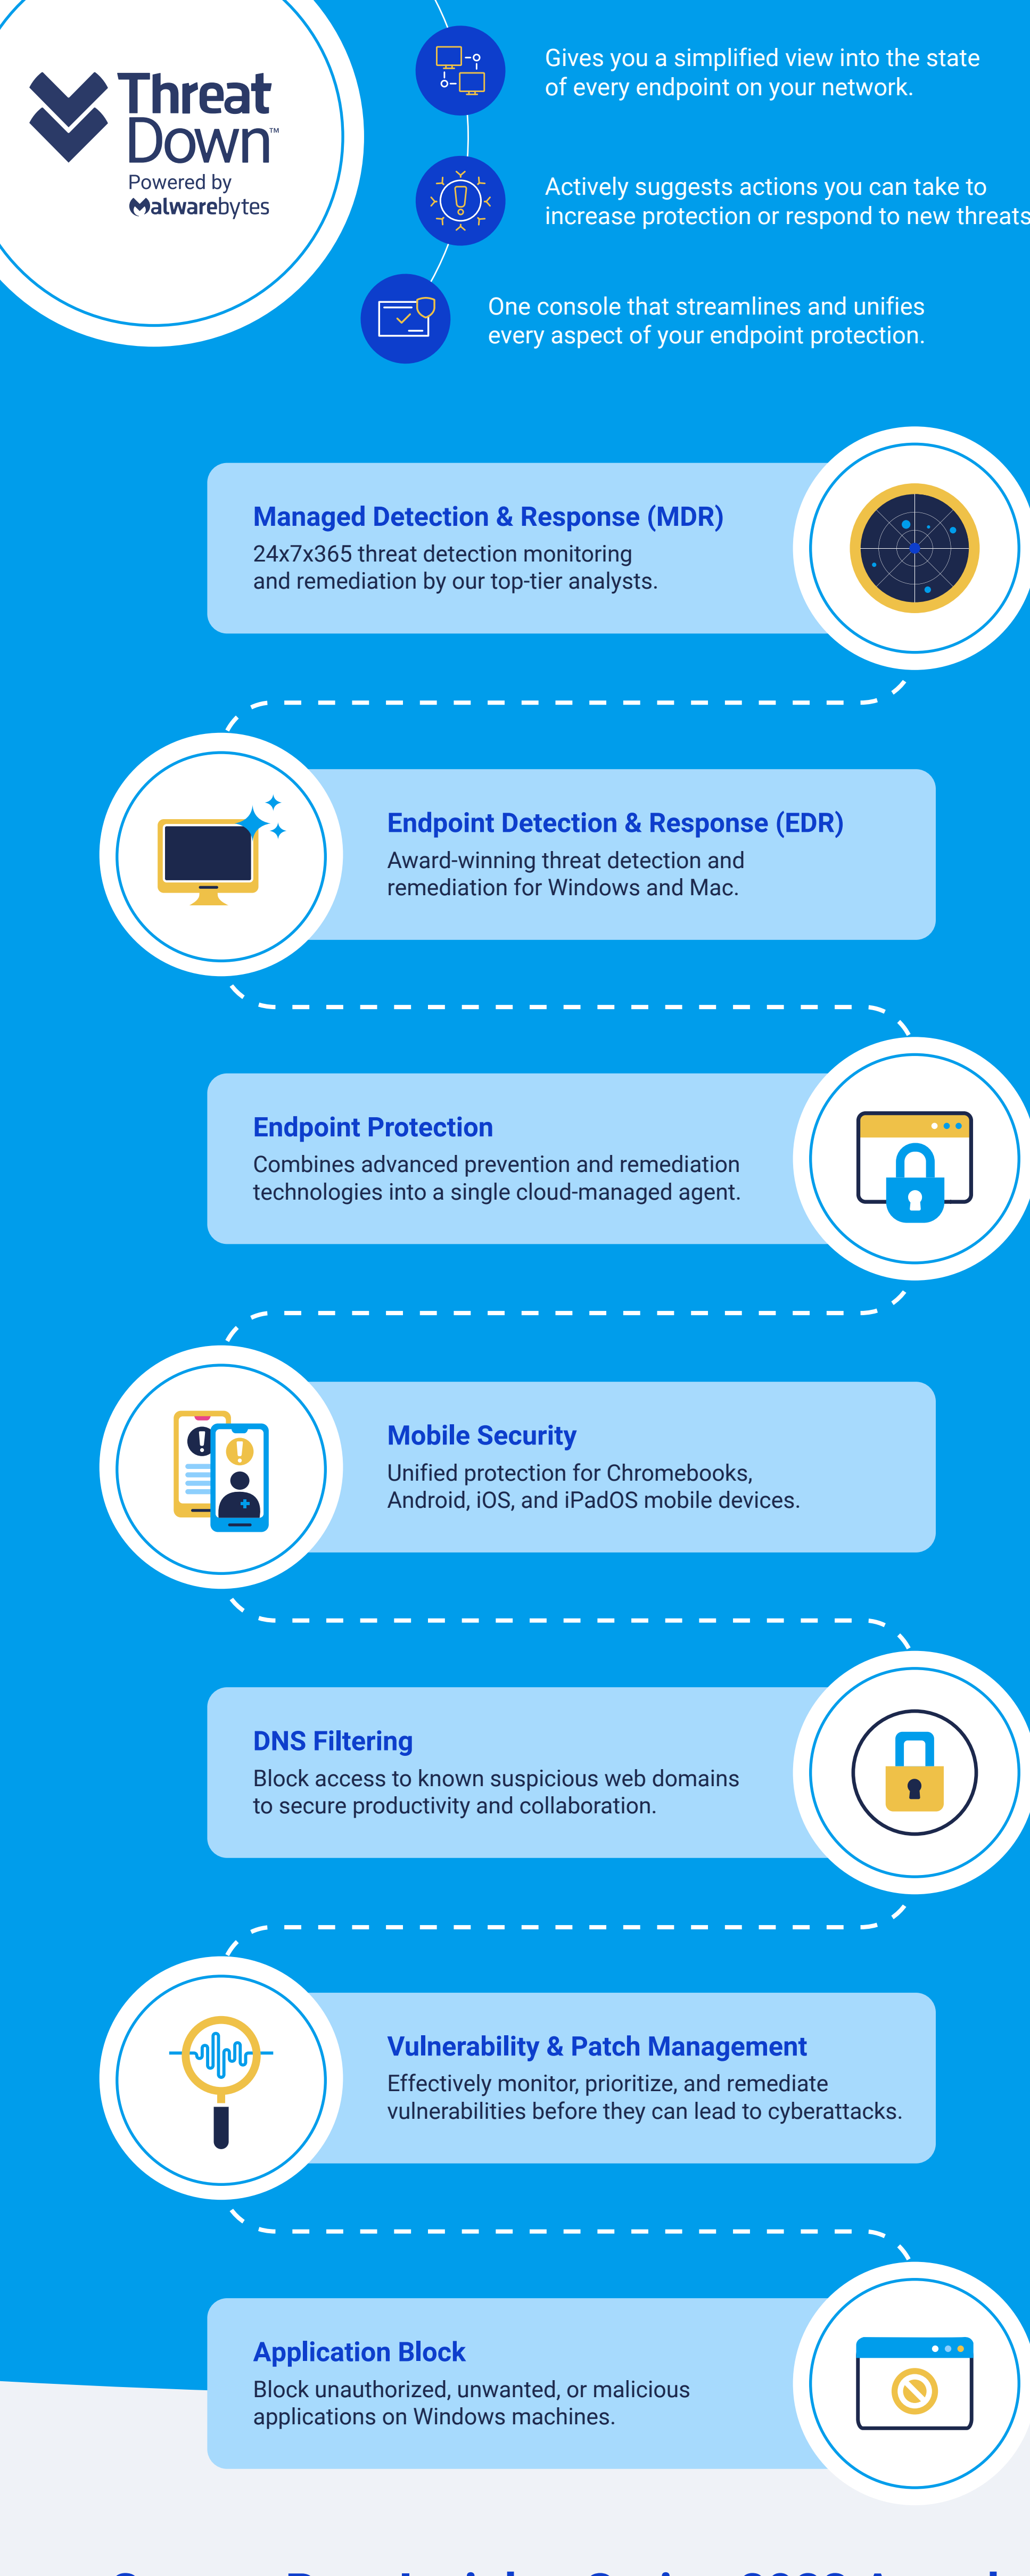

## The safe and smart choice to protect your business

Let's face it, most enterprise cybersecurity solutions are too complex. That's why ThreatDown created a simple, intuitive cybersecurity solution that doesn't require domain knowledge to install and manage, but still delivers enterprise-level cyber protection.

## ThreatDown cybersecurity suite:

## Gartner Peer Insights Spring 2023 Awards

ThreatDown is a leader in 24 categories, including:

- #1 overall** in Endpoint Protection Suites
- #1 Best ROI** for Endpoint Detection & Response
- #1 implementation** (seamless setup, user-friendly experience)
- #1 in usability** (ease of use, administration, adoption)

## What our customers have to say about us

**Cyber threats are 24/7, and my team needs to sleep.** With ThreatDown MDR backing us up, I know that we have a security team watching over our shoulder and making sure it's all clear.

– Dennis Davis, IT Systems Manager, Drummond

## What makes ThreatDown different?

- We find the threats that others don't.
- We're faster to install and easier to manage.
- We're built for everyone, not just big enterprises.
- We provide a complete, integrated solution.
- We're available in single tenant and multi-tenant deployment models
